

Orange City Equipment wants to remind everyone that although lawn mowing and landscape maintenance tends to slow down in Florida during the cooler Fall and Winter months, it's still important to maintain your lawn mower and other power equipment in top condition all year round.

Don't wait until the busy Spring and Summer months to bring us your equipment. Now is the perfect time to get the oil and air filter changed and have other routine checks and maintenance done including replacing worn spark plugs and mower blades, etc.

Doing routine maintenance on your lawn mower and power equipment will ensure that it will continue running well from season to season.

Stop by or call us at 386-775-1200.
